

STEP-UP BENCH COMPARISON CHART

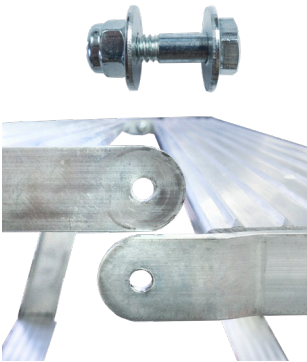

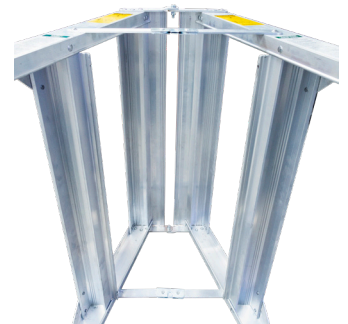

STEP-UP BENCH

OTHER BRANDS

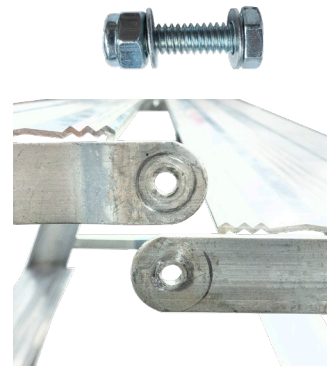

Reinforced fully-enclosed crossbeam structure adds durability with a more stable surface.

U-shape open and weaker crossbeam structure.

Hex cap (partially threaded) bolts reduce joint wear and increase longevity of the product.

Hex tap (fully threaded) bolts increase joint wear and reduce product lifespan.

Double-rivets create a safer and further reinforced step.

A single rivet on the frame lacks rigidity.

SurPro® STEP-UP BENCH
